

# Introduction to Outdoor Learning for Classroom Teachers

NESA Registered Professional Learning Program – 3 hours

Whole of staff afternoon PL sessions

This course provides teachers with an overview of current research into the benefits for students of outdoor learning and practical techniques of how to implement outdoor lessons linked to the curriculum. Teachers will develop their own outdoor learning session to deliver and reflect upon. Each stage will consider how they can implement curriculum based outdoor learning as an ongoing feature in their teaching programs.

This program consist of three components:

## Part 1 - The first 1 hour afternoon TPL session

Workshop participants will learn about the research into the benefits of outdoor learning, examples of current practice in schools before heading outside for some practical sessions

## Part 2 - Develop and implement an outside lesson

Teachers are to choose one lesson that they can adapt in their current program that they can take outside. Teachers are to trial the outdoor learning and complete a PMI to share at the next session.

## Part 3 - The second 1 hour afternoon TPL session

During the second session, workshop participants will reflect and share their PMI's. There will also be an opportunity for more practical outdoor activities and a session to plan what is next.

**Cost:** There is no cost
